Indoor RTD Probe (Transmitter) BTS(O)R

- ◆ Low cost
- ◆ Pt_x sensitive element
- ◆ 2-wire 4...20 mA output available
- ◆ Easy & Fast connection plug
- ◆ Ready to use - no adjustments
- ◆ DIN-rail accessory available

The indoor temperature probes BTSR and BTSOR measure temperature by means of a Pt_x sensitive element mounted in a copper sheath for faster reaction. The BTSOR model, in addition, converts the measured temperature into standard 4...20 mA 2-wire signal. Both models are enclosed in a freely mountable small plastic IP44 box that may also be mounted on a DIN rail when an optional mounting clamp is installed, and are equipped with a 3-pin plug-in terminal that allow fast and easy electrical decoupling. Five different temperature measurement ranges from -50 °C and up to 100 °C as well as customer specified ranges are available. Thanks to their simplicity, small size, and affordable price, BTSR and BTSOR are applicable for various indoor applications, room temperature control, control board temperature measurement, etc.
