Ultrasonic Level Meter  BULM500

- Non-contacting measurement
- No moving parts
- Integral LCD and push-buttons for on-site programming
- Continuous measurement of level or distance-to-surface.
- Measuring range up to 40m
- Rugged ABS housing
- ABS/PVC/PTFE wetted material
- Protection IP67
- Output 4-20mA & RS485 MODBUS
- HART or PROFIBUS (option)
- Cable between probe and host up to 1000m

MEASUREMENT PRINCIPLE
The BASI BULM500 Series is a liquid or solid level meter based on ultrasonic technology that is suitable for many liquid and solid applications. Ultrasonic pulse signals are transmitted and reflected from the liquid or solid surface. The transmitter "listens" for reflected signals (echoes) and measures the time-delay between transmitting and receiving. The distance to the liquid surface is automatically calculated using the computed time-delay. An integral temperature sensor continuously measures the air temperature around the transmitter. It then computes the speed of sound in air, automatically compensating the distance for temperature effects. The distance measurement can be sent through the 4–20 mA & RS485 MODBUS output. HART, PROFIBUS protocol on request.

TECHNICAL SPECIFICATIONS
Range (1) : 0-4, 0-6, 0-8, 0-10, 0-15, 0-20, 0-30, 0-40m
Dead zone : 0,2, 0,25,0,3, 0,4, 0,6, 1,2 1,4, 1,6m
Beam Angle : 8°(3db) for range: 4, 6, 8m
: 6° (3db) for range 12, 15, 20, 30, 40m
Measuring cycle : 1 second
Damping : Adjustable
Output signal : 4-20mA & RS485 MODBUS
Baud rate : 19200/9600/4800
Protocol : HART, PROFIBUS, MODBUS (standard)
Relay output : 2, 4, 6 relay 5A/250VAC
Power supply : 24VDC 30mA or 220VAC
Load limitation : 0 - 500Ω
Indicator : 14-digit LCD in two rows
Protection : IP67 weather-proof
Zero and span : Push button adjustment or remote
Ambient temp : -40 to 80 °C
Temp. Comp. : whole range
Pressure : ±0,1Mpa (1bar)
Humidity limits : 0 - 100% RH
Configuration : By 3 pushbutton or remote

Note 1: When using to measuring solid level, the most energy of ultrasonic is absorbed or scattered by solid level, so the back wave is very little, the valid measuring range of solid level is about 50% of liquid level. And the valid measuring range of solid level is determined by the installing location and range.

Performance Specifications
Resolution : 1mm
Inaccuracy : 0.2% FS (in air)
Power supply effect : Negligible between 20 and 32 VDC
EMC : EN 50081-1, EN 50082-2, 89/336/EEC

Physical Specifications
Electrical connection : PG13,5
Process connection : G2", M95 or flange
Wetted parts : ABS/PVC/PTFE
Electronic housing : ABS
Identification plate : 304 SST
Approximate weight : 1.8 to 5kg depending of model
Mounting : Directly supported by piping or flange

### Mechanical Specifications

- **Probe 4, 6 & 8m**
- **Probe 10 & 12m**
- **Probe 15, 20, 30 & 40m**

The probe must extend into the container.
